Curated sample

Technology in the classroom

Some people believe that technology has made learning more effective, while others think it has created more distractions for students.

Discuss both views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least **250** words in about **40** minutes.

Scoring limits

Practice estimates, not official IELTS scores

- Public May 2023 band descriptors guide the rubric
- Exact quotation checks do not prove score accuracy
- Small benchmark checks are not an accuracy guarantee

Privacy boundaries

- Drafts stay in the browser by default
- Confirmed assessment sends the essay to OpenAI via Replit
- No server storage or logging of essay bodies
- PostgreSQL stores generated prompts and usage counts
- No learner accounts; provider data policies still apply

AI cost safeguards

- Approved model: OpenAI GPT-5 nano
- **Maximum 20 AI attempts per Jakarta calendar day**
- Failed attempts count; no automatic retries
- Shared database reservations enforce the limit
- Request limit is not a dollar spending cap

Publishing readiness

- Production builds and readiness checks passed
- Live-AI hosting and production database approved
- **Final publishing action remains with the owner**
- Export preview drafts before switching to the live site
- Deprecated AI model; no automatic replacement
